Professional experience

Metaverse911, Noida (India's First Metaverse Center)

05/2025 – 07/2025

Development Intern

- Worked on live projects integrating VR with AI for real-world industry clients.
- Built a VR-based chatbot using Conval API.
- Independently developed and hosted an AI chatbot using three.js and Gemini API.
- Explored and implemented Meta All-in-One SDK, gaining hands-on understanding of its architecture and use in immersive environments.

Bluechip Infocorp, Rajkot

05/2024 – 07/2024

Unity AR Developer Intern

- Developed AR applications using Unity & Vuforia, and deployed across WebGL.
- Mastered C# scripting and animation in Unity.
- Worked with 3 AR projects from development to deployment on multiple platforms.

Education

Marwadi University

2022 – 2026

B.Tech in Information and Communication Technology

Skills

Computer software/ frameworks

Unity 3d, Unreal Engine, Blender, Vuforia, AR Foundation, Area Target Generator, Model Target Generator, Maya, WebGL, MRTK (Mixed Reality Toolkit), Meta All-in-One SDK Postman, YOLO, Tensorflow, ML Algorithms

Programming languages

C, C++, C#, Python

Volunteer Experience:

IEEE Gujarat Section

02/2025 – Present

Chair SSR

10x Coding Ninjas Marwadi Chapter

01/2025 – Present

Campus Outreach Officer [COO]

Circuitology Club Marwadi Univerty

07/2022 – 11/2024

Tech Lead

Projects

VR-Based Interior Design Application

- Created an immersive, VR-style walkthrough using Unity WebGL to simulate real-time interior customization. Designed an interactive space where users can explore and modify layouts effortlessly.

AR+IOT

- Built a system to control appliances in real time through AR, merging physical space with digital commands. Turned simple interactions into futuristic experiences.

Comprehensive AR Application Using Unity and Vuforia:

- Integrated all four AR types into a single platform with seamless transitions and intuitive UI. Designed to make anyone curious about how AR can transform everyday tasks.

AI InterviewBot

- Developed a realistic virtual interview environment with a 3D avatar and Gemini API, generating dynamic, resume-based questions. Added features to mimic a strict, real interview experience to prepare students effectively.

Patents and Research

AR Training Simulations for Railway Staff

Digital Lamp (Diya) Lighting Circuit

Smart AR Typing Trainer Keyboard

Augmented Reality-Based Support System for Automotive Assembly Using Unity and Vuforia

Accepted at ICIDS 2025, Manipal University, will be published in Springer

VocalSwap: A Review of StarGANv2-VC for Singer-to-Singer Voice Replacement

Integrating Augmented Reality and Machine Learning Using YOLOV3 and ARKit
